
REMARKS

REGARDING THE AMENDMENTS

This paper intends to correct a defect noted by the office in a Notice to File Missing Parts mailed 2/12/2004. The originally filed specification refers to figures 9 and 10, however no figure 9 was filed with the application papers.

In order to correct this inconsistency, applicant amends figure 10 of the drawings to be figure 9. To this end, applicants provide a replacement sheet 10 and a sheet showing this change in red. By the above amendments to the specification, applicants remove all reference to figure 10 from the written specification. Applicants believe that these amendments to the specification and drawings bring the specification and drawings into agreement, and further believe no new matter is introduced.

Applicants appreciate the understanding of the office in this matter.

Respectfully submitted this 10 day of June, 2004.
